# Heated Towel Rails

Invite warmth and comfort to your everyday with Fienza heated towel rails. Having quickly become a bathroom essential, heated towel rails provide fresh and dry towels all year round. Suited for the Australian climate, you can snuggle up to warm towels in the winter and dry towels in the summer.

Bathrooms are damp environments, creating ideal conditions for bacteria to grow. Our towel rails have an electric heating element that will keep your towels warm, fresh and dry for longer creating a more hygienic environment in your bathroom.

Our ladder style towel rails are fantastic for bathrooms with limited space, providing more towel storage with their multi-tiered design. The generous gaps allow for bulky fabrics to be draped over with ease. Our heated towel rails can also be used to help dry light garments and swimwear.

## SAFE FOR BATHROOMS

All Fienza heated towel rails are manufactured in accordance with Australian Standards and are SAA Approved. All rails have an IP55 rating for protection against dust and water ingress.

## EFFICIENT & CONVENIENT

Heated towel rails start warming up in as little as 5 minutes, reaching full temperature in 20 minutes.

## SAVES WATER & ELECTRICITY

Minimises continuous washing and tumble drying of towels, saving on water and electricity costs.

## HIGH QUALITY MATERIALS

Each towel rail is carefully crafted from high quality 304 stainless steel for long-lasting durability.

## INDUSTRY LEADING WARRANTIES

Fienza offers up to 15 years warranty on our heated towel rails for peace of mind. Visit our website for more details: [fienza.com.au](http://fienza.com.au)

# Luxurious Styles

Add both luxury and functionality to your bathroom with our Isabella, Kaya, Koko and Lillian heated towel rails. Whether you're looking for a standout piece or a discrete design, our extensive range will cater to your style.

## HOW TO CHOOSE YOUR HEATED TOWEL RAIL

The below questions are some important factors to consider before purchasing your heated towel rail.

### What size will fit my bathroom?

Keep in mind the number of people that use the bathroom and how many towels you want to keep warm. A heated towel rail with more bars would be ideal for a larger family as it holds more towels, helping to keep your bathroom tidy.

### Which style will suit my bathroom?

Consider which style of rail will suit your bathroom space. Is your preference modern or traditional style? Straight or curved lines? Selecting a style that complements other fittings, such as tapware, will ensure a cohesive design.

### What type of wiring installation do I need?

The Isabella range offers both concealed (hard-wired) and exposed (plug-in) wiring installations. The Kaya, Koko and Lillian ranges offer concealed wiring only.

See page 6 for installation types and look out for these icons on the following pages.

Concealed  
Wiring

Exposed  
Wiring

# Quality Finishes

Our heated towel rails are available in various sizes and finishes to accomodate your space. Our range of colours are applied using different technologies to ensure a beautiful and long-lasting finish. Complement your bathroom with matching tapware, showers and accessories.

## OPERATION AND TEMPERATURE

All rails distribute 35-60°C surface temperature, warming towels quickly and efficiently.

### 5 Minutes

The heated towel rail starts to get warm in as little as 5 minutes of operation.

### 20 Minutes

The temperature increases to 35-60°C after 20 minutes of operation.

### 45 Minutes

The surface temperature remains a stable 50-60°C after 45 minutes of operation.

### CHROME

Polished electroplated chrome endures as the number one finish for its proven durability and versatility for a wide range of bathroom styles.

### MATTE WHITE

The ideal companion to neutral or soft colour palettes, our electroplated matte white finish is elegantly smooth, fresh and durable.

### MATTE BLACK

A premium electroplated coating gives our matte black range consistent colour and a durable finish. It is a popular choice for adding contrast.

### BRUSHED NICKEL

PVD brushed nickel has a similar look to unpolished stainless steel with a warm grey finish that can add softness to your colour palette.

### GUN METAL

The dark, brushed tone of our PVD gun metal finish is ideal for those seeking an industrial, evocative feel for their bathroom.

### URBAN BRASS

With a lightly brushed finish, PVD urban brass evokes the quality of brass while giving your bathroom a modern, stylish accent colour.

# Installation Types

## Concealed Wiring (Hard-Wired)

Concealed wiring installation has no visible cables as it is hard-wired through the wall. The hidden wiring is not only more aesthetic, but allows the towel rail to be installed safely next to wet areas.

The wiring position is available at the top right or bottom left mounting points. This type of installation must be performed by a licensed electrician.

**Available in: Isabella, Kaya, Koko, Lillian**

## Exposed Wiring (Plug-In)

Exposed wiring installation has a visible 1.5m cable that plugs into a standard household power outlet. The wiring positions are available at any of the 4 mounting points.

This type of installation is ideal for retrofit applications as the rail can be mounted directly to the existing wall and plugged in to a nearby power point.

**Available in: Isabella**

# Safety Zones

**IMPORTANT:** This information is a guide only and is based on information contained within AS/NZS 3000:2018. Installation must be carried out by a qualified electrician in accordance with all current regulations.

## ELECTRICAL SAFETY IN WET AREAS

Bathrooms are zoned according to Australian Standards. All domestic installations must comply with guidelines based on zonal requirements. It is always recommended to consult a licensed electrician for advice on installation.

### Zone 0

Areas inside the bath, shower and basin. Zone 0 can only be used for low voltage installations (max 12V).

### Zone 1

Above the bath or in the shower recess. Zone 1 requires a minimum IP44 rating. The wall switch must be installed outside Zones 1-2.

### Zone 2

Heated towel rails with a minimum IP44 rating and 230/240V can be installed in Zone 2.

## WHAT ARE IP RATINGS?

Electrical fixtures in bathrooms are certified using an IP (Ingress Protection) rating. All Fienza heated towel rails have an IP55 rating. This provides protection against solid and liquid particles that could be harmful to normal operation.

The first number (0-6), represents protection against foreign materials, such as dust particles. The second number (0-8), represents protection against liquids, such as water spray and moisture. The greater the numbers, the more protection.

# Isabella

## HEATED TOWEL RAILS

Invite luxury into your space with the Isabella heated towel rail. Our Isabella range now offers a single vertical rail design or classic ladder style, with both concealed (hard-wired) or exposed (plug-in) installation options. Pair the Isabella with sleek tapware, showers and accessories.
